Report Description

Key Take-Aways

- Define and measure global ophthalmology drugs and devices market with respect to their sub-segments and analyze the market structure by identifying them.
- Forecast revenues of the global ophthalmology drugs and devices market and its various submarkets with respect to four main geographies of U.S., Europe, Asia and Rest of the World (ROW).
- Identify major market trends and factors driving or inhibiting growth of the global ophthalmology drugs and devices market and its various submarkets
- Strategically analyze each submarket with respect to individual growth trends and contribution to the overall ophthalmology drugs and devices market
- Analyze opportunities in the market for the stakeholders by identifying high-growth segments of the global ophthalmology drugs and devices market
- Track and analyze competitive developments such as alliances, joint ventures, mergers and acquisitions, new product developments and research and development in the global ophthalmology drugs and devices industry

Report Description

Global ophthalmology devices and drugs market is witnessing a significant growth due to the increasing incidence and prevalence of eye related disorders such as presbyopia, macular degeneration, and diabetic retinopathy among the aging population. With the introduction of ophthalmic devices equipped with sophisticated technologies, people are increasingly opting for ophthalmic surgeries to correct their eye related disorders.

Ophthalmology devices cover major eye problems such as cataract, refractive error and other retinal disorders. The cataract devices market includes intraocular lenses and phacoemulsification

devices, the refractive error devices include excimer lasers and contact lenses, and devices for other retinal disorders are vitrectomy systems. The ophthalmology drugs market covers treatment based drugs, OTC drugs and anesthetics. The report analyzes future potential for all these markets and also technology trends seen in these markets in the recent past.

The report forecasts, identifies and analyses market trends, drivers, restraints and opportunities, competitive landscape and strategic developments.

Market Covered

The report categorizes global ophthalmology devices market based on major eye disorders such as cataract, refractive error and other retinal disorders. It segments the global ophthalmology drugs market on the basis of treatment based drugs, OTC drugs and anesthetics. In addition to market sizes and forecasts, the report identifies and analyzes trends and opportunities for each submarket; providing market tables for submarkets in the U.S., Europe, Asia Pacific, and Rest of the World (ROW), with the latter comprising of Russia, CIS, Australia, New Zealand, Canada, Mexico, and Africa.

Stakeholders

- Ophthalmology devices manufacturing companies
- Ophthalmology device distributors
- Pharmaceutical and ophthalmic drug manufacturing companies
- Clinical research firms
- Governing bodies
